

# Banner Fix for Firefox

Note: You must have version Java 8u5 or above. These instructions are for Windows 7.

- 1) If Java is installed done open “**Control Panel**” on your computer.

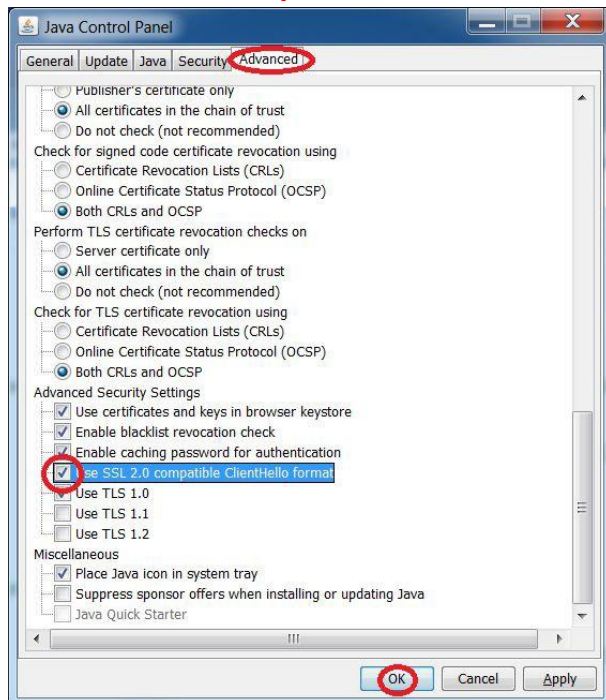

- 2) After opening Control panel make sure you are in the viewing of “**Large icons**”.

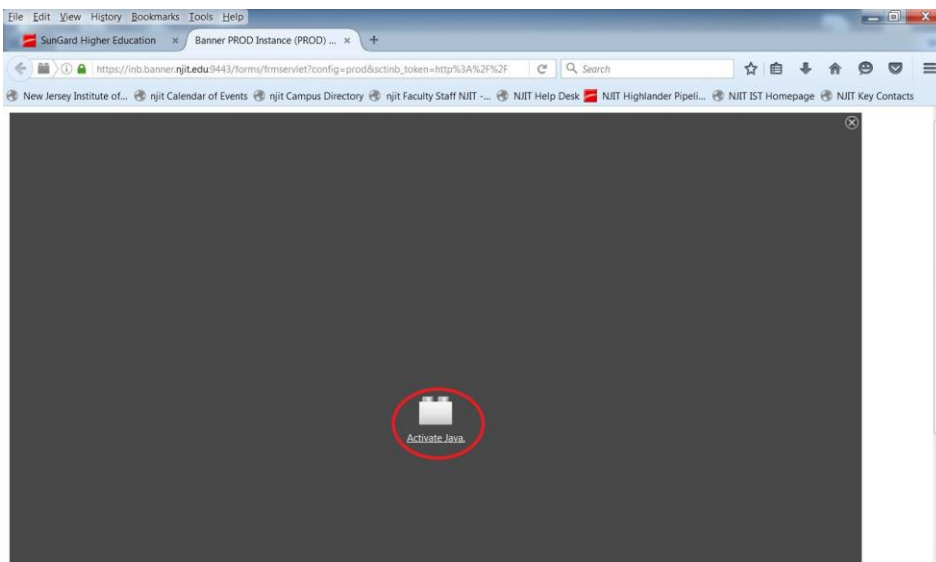

3) Click **“Java (32-bit)”**

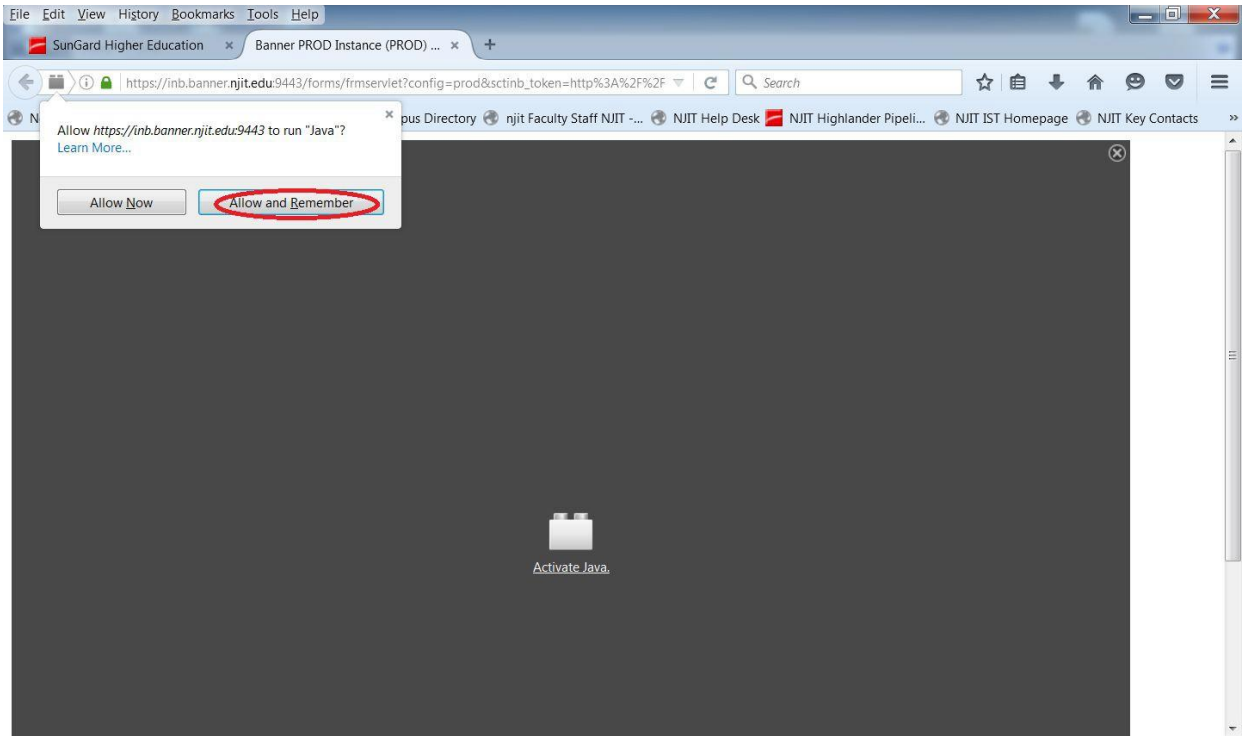

Click on the **“Advanced”** tab, scroll down to **“Advanced Security Settings”**, check the box next to **“Use SSL 2.0 compatible ClientHello format”**, then click **“OK”**

4) After clicking **“OK”** open Firefox and access banner. You will get the following page below. Click **“Activate Java”**

5) Click **Allow and Remember**

6) After that you will get a couple of prompts to Run or Cancel. Click **Run** and banner will appear.
